

Bonny Makiankhondo

Software Engineer | Data & Analytics | AI-Enabled Systems

Chicago, IL 312-966-9631 bmakiankhondo@icstars.org bonnymak.tech [LinkedIn](#) [GitHub](#)

PROFESSIONAL SUMMARY

Software engineer and Data & Analytics Apprentice at Aon building toward a career across data-driven products, analytics, backend systems, and applied AI. Experience includes live SaaS development, client-facing analytics work, relational data modeling, APIs, authentication, dashboards, and multi-service automation. Strongest across Python, SQL, React/TypeScript, FastAPI, PostgreSQL, Power BI, and AI-enabled workflows, with current Databricks training through the Aon apprenticeship.

EXPERIENCE

Data & Analytics Apprentice — Aon

Aug 2026 – Present

Construction & Infrastructure | Chicago, IL

- Embedded within Aon's Construction & Infrastructure Data & Analytics function through a structured apprenticeship combining enterprise work, technical development, and college coursework.
- Developing skills across data workflows, SQL, Python, Excel, Power BI, and Databricks training while learning how analytics supports construction and infrastructure business needs.
- Building experience inside a cross-functional enterprise environment with data and analytics, business, broking, and client-facing stakeholders.

Full Stack Engineering Intern — i.c.stars

Aug 2025 – Dec 2025

Technology, Business & Leadership Development | Chicago, IL

- Co-delivered a customer-insights dashboard selected by United Airlines in a competitive RFP under client-facing deadlines.
- Translated stakeholder needs into KPI layouts, data-visibility rules, and reporting flows for executive and analyst use cases.
- Engineered an AI-supported insight layer with the Anthropic Claude API and contributed role-aware access, debugging, documentation, demos, delivery planning, and client presentation support.

TECHNICAL SKILLS

Data & Analytics: Python, SQL, Power BI, Excel; Databricks (current training)

Frontend: TypeScript, JavaScript, React, Vite, Tailwind CSS, React Router, TanStack Query, Recharts

Backend / APIs / Data: FastAPI, SQLAlchemy, Alembic, Node.js, Express, REST APIs, PostgreSQL

AI / Delivery: LLM APIs, RAG, embeddings, semantic search, pgvector, Docker, GitHub Actions, Supabase, Railway, Netlify

PRIOR TECHNICAL EXPERIENCE

Heat & Frost Insulator — Union Local 75

South Bend, IN | 2018 – 2023

Safety discipline, technical precision, planning, documentation, and reliable execution under field constraints.

Electrical Technician — Alexander Dennis Inc.

Nappanee, IN | 2016 – 2018

Electrical assembly and troubleshooting grounded in systems thinking, diagnostics, quality control, and reliability.

Selected Engineering Work

Products, analytics, backend systems, and applied AI

Bonny Makianiankhondo bonnymak.tech github.com/bonny2long

SELECTED PROJECTS

Time Ledger

React/TypeScript · FastAPI · PostgreSQL · SQLAlchemy/Alembic · Supabase Auth

Built a live multi-workspace SaaS for weekly time tracking, team operations, clients, projects, review, reporting, and billing summaries. Designed authenticated workflows across the frontend, API, relational data layer, onboarding, deployment, and account lifecycle protections.

timeledger.me

Personal Media & NAS Automation Platform

Python · PostgreSQL · SQLite · Multi-service architecture · Automated testing

Built and locally accepted a four-application workflow for stable media intake, human-reviewed classification and final moves, music/audiobook playback, and fail-closed cleanup reporting. Verified a 21-file real-media canary with zero SHA-256 mismatches; physical TrueNAS deployment is deferred.

ICAA Headquarters / SyncUp

React · Node.js/Express · Supabase Postgres/Auth · RBAC

Building a role-aware community operations platform across onboarding, protected routes, member directories, projects, bookings, collaboration, and administration. Refined role semantics, verification, mobile UX, and production-readiness planning.

github.com/bonny2long/SyncUp

United Airlines Customer Insights

React · Analytics dashboards · Anthropic Claude API · RBAC · Power BI

Helped deliver a winning customer-insights solution through i.c.stars, centered on executive/analyst KPI visibility, customer-feedback interpretation, structured AI-supported recommendations, role-aware access, and client presentation.

NAS ACCEPTANCE EVIDENCE

Workflow: Final local four-application acceptance — PASS

BM Radio library: 275 physical tracks / 261 logical recordings / 1 audiobook

Regression: BM Radio 63 passed / 0 failed / 4 skipped; Intake Watcher 14/14

Safety: Cleaner 9/9; report-only, destructive deletion disabled

EDUCATION & PROFESSIONAL DEVELOPMENT

Harold Washington College — Chicago, IL

Aon Apprenticeship Coursework | 2026 – Present

Business/general coursework and IT topics including Networking Essentials, Cybercrime and Incident Response, and Information Security Systems Analysis.

i.c.stars

Technology, Business & Leadership Development | Aug 2025 – Dec 2025

Completed client-facing full-stack engineering, business, communication, and leadership development.

Ivy Tech Community College

A.A.S. in Construction Management

Academic foundation in construction operations, planning, coordination, and infrastructure context.
